WHO RESPONSE

Ethiopia Updates

- WHO has deployed several experts in the disciplines of epidemiology, case management, community engagement among others in Dire Dawa and Harreri to strengthen the response to COVID-19
- The Country with the support of WHO and other partners, have revised hand washing and social distancing messages to target Islam and other religious groups such as Catholics
- There are several returnees from Djibouti and Saudi Arabia who are quarantined at Addis Ababa Science and Technology University that are posing additional pressure to COVID-19 response
- All health and non-health partners are strongly encouraged to support the government efforts in responding to COVID-19

African countries reporting COVID-19 cases

Globally

WHO’s strategic objectives for this response are to;

- Interrupt human-to-human transmission including reducing secondary infections among close contacts and health care workers, preventing transmission amplification events, and preventing further international spread
- Identify, isolate and care for patients early, including providing optimized care for infected patients
- Identify and reduce transmission from the animal source
- Address crucial unknowns regarding clinical severity, extent of transmission and infection, treatment options, and accelerate the development of diagnostics, therapeutics and vaccines
- Communicate critical risk and event information to all communities and counter misinformation
- Minimize social and economic impact through multisectoral partnerships.

You are therefore advised to observe the following;

- Frequently clean hands by using alcohol-based hand rub or soap and water
- When coughing and sneezing cover mouth and nose with flexed elbow or tissue and wash hands;
- Avoid close contact with anyone who has fever and cough
- If you have fever, cough and difficulty breathing seek medical care early and share previous travel history with your health care provider
